

## **ENERGY POLICY**

### **ASSOCIATED MOTORWAYS (PRIVATE) LIMITED**

As the pioneer in rubber manufacturing in Sri Lanka, we remain continuously committed to delighting our customers by providing high-quality tyres and other rubber products produced through the efficient and responsible use of energy.

Our top management is committed to and responsible for setting energy objectives and targets and is committed to provide the necessary information and resources to enhance energy performance and ensure the continual improvement of our Energy Management System.

We strive to minimize energy wastage and improve performance across all processes. Our Energy Management System encompasses manufacturing design, procurement, and production functions to ensure effective energy use and continuous improvement. This approach reinforces economic, social, and environmental sustainability while ensuring compliance with legal and other applicable requirements. Customer satisfaction remains a key focus within our commitment to continual improvement

#### **Our Objectives**

1. Efficient and responsible use of energy resources.
2. Minimization of energy wastage and production costs.
3. Continuous improvement in energy performance.
4. Promotion of energy awareness among employees.

**Ajith Saputhanthree**
